Mastering JXTA: Building Java Peer-to-Peer Applications (Java Open Source Library) Joseph D. Gradecki

A comprehensive, code-intensive guide to building commercial-quality peer-to-peer applications with JXTA and Java. Tens of millions of people use peer-to-peer (P2P) applications such as KaZaA, AOL Instant Messenger, and Distributed.net. These applications harness the idle CPU cycles of their host computers to produce enormous databases of information, build powerful processing engines, and enable communication and file-sharing among users around the world. Previously, P2P applications have been built using proprietary technologies and protocols, forcing developers to start from scratch each time they write a new application. Now JXTA, an open source, P2P development technology, enables developers to build P2P applications using Java, XML, and other industry standards. With this invaluable book, Joseph Gradecki provides a practical guide to building peer-to-peer applications using Java. He provides detailed descriptions of the JXTA technologies and demonstrates how to build real-world applications. This book also includes: Detailed descriptions of the JXTA specification and the Java reference implementation The complete P2P development process, including how to build reusable application frameworks Fully functional example applications, including a distributed computational engine that can utilize the idle CPU power of thousands of remote machines to solve complex problems, and a fault-tolerant, encrypted network storage system The companion Web site includes: All the code listings and complete applications from the book Links to additional JXTA and P2P resources

From reader reviews:

Regina Noble:

Book is actually written, printed, or highlighted for everything. You can know everything you want by a book. Book has a different type. We all know that that book is important thing to bring us around the world. Next to that you can your reading talent was fluently. A reserve Mastering JXTA: Building Java Peer-to-Peer Applications (Java Open Source Library) will make you to always be smarter. You can feel much more confidence if you can know about every little thing. But some of you think which open or reading any book make you bored. It's not make you fun. Why they may be thought like that? Have you trying to find best book or appropriate book with you?

Joan Freeman:

The event that you get from Mastering JXTA: Building Java Peer-to-Peer Applications (Java Open Source Library) could be the more deep you rooting the information that hide into the words the more you get interested in reading it. It does not mean that this book is hard to know but Mastering JXTA: Building Java Peer-to-Peer Applications (Java Open Source Library) giving you joy feeling of reading. The article author conveys their point in specific way that can be understood by anyone who read the item because the author of this guide is well-known enough. This kind of book also makes your current vocabulary increase well. It is therefore easy to understand then can go together with you, both in printed or e-book style are available. We highly recommend you for having this particular Mastering JXTA: Building Java Peer-to-Peer Applications (Java Open Source Library) instantly.

Jesse Hooker:

Beside this specific Mastering JXTA: Building Java Peer-to-Peer Applications (Java Open Source Library) in your phone, it could possibly give you a way to get nearer to the new knowledge or data. The information and the knowledge you may got here is fresh from your oven so don't end up being worry if you feel like an older people live in narrow community. It is good thing to have Mastering JXTA: Building Java Peer-to-Peer Applications (Java Open Source Library) because this book offers to you readable information. Do you often have book but you seldom get what it's facts concerning. Oh come on, that wil happen if you have this in your hand. The Enjoyable option here cannot be questionable, just like treasuring beautiful island. Techniques you still want to miss this? Find this book as well as read it from right now!

John Wiser:

What is your hobby? Have you heard in which question when you got college students? We believe that that issue was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And you also know that little person similar to reading or as reading become their hobby. You have to know that reading is very important as well as book as to be the thing. Book is important thing to add you knowledge, except your own personal teacher or lecturer. You discover good news or update concerning something by

book. Different categories of books that can you choose to use be your object. One of them is this Mastering JXTA: Building Java Peer-to-Peer Applications (Java Open Source Library).
