Rule Extraction from Support Vector Machines (Studies in Computational Intelligence)

Rule Extraction from Support Vector Machines (Studies in Computational Intelligence)

Support vector machines (SVMs) are one of the most active research areas in machine learning. SVMs have shown good performance in a number of applications, including text and image classification. However, the learning capability of SVMs comes at a cost – an inherent inability to explain in a comprehensible form, the process by which a learning result was reached. Hence, the situation is similar to neural networks, where the apparent lack of an explanation capability has led to various approaches aiming at extracting symbolic rules from neural networks. For SVMs to gain a wider degree of acceptance in fields such as medical diagnosis and security sensitive areas, it is desirable to offer an explanation capability. User explanation is often a legal requirement, because it is necessary to explain how a decision was reached or why it was made. This book provides an overview of the field and introduces a number of different approaches to extracting rules from support vector machines developed by key researchers. In addition, successful applications are outlined and future research opportunities are discussed. The book is an important reference for researchers and graduate students, and since it provides an introduction to the topic, it will be important in the classroom as well. Because of the significance of both SVMs and user explanation, the book is of relevance to data mining practitioners and data analysts.

From reader reviews:

Milton Jones:

The book Rule Extraction from Support Vector Machines (Studies in Computational Intelligence) make one feel enjoy for your spare time. You may use to make your capable a lot more increase. Book can being your best friend when you getting stress or having big problem with your subject. If you can make reading through a book Rule Extraction from Support Vector Machines (Studies in Computational Intelligence) to become your habit, you can get much more advantages, like add your capable, increase your knowledge about a number of or all subjects. You may know everything if you like open and read a publication Rule Extraction from Support Vector Machines (Studies in Computational Intelligence). Kinds of book are a lot of. It means that, science guide or encyclopedia or some others. So , how do you think about this book?

Teressa Fernandez:

The book Rule Extraction from Support Vector Machines (Studies in Computational Intelligence) has a lot details on it. So when you make sure to read this book you can get a lot of benefit. The book was written by the very famous author. Mcdougal makes some research just before write this book. This particular book very easy to read you can find the point easily after reading this article book.

Jerry Thomas:

The reason? Because this Rule Extraction from Support Vector Machines (Studies in Computational Intelligence) is an unordinary book that the inside of the guide waiting for you to snap that but latter it will jolt you with the secret that inside. Reading this book beside it was fantastic author who write the book in such awesome way makes the content interior easier to understand, entertaining approach but still convey the meaning thoroughly. So , it is good for you for not hesitating having this anymore or you going to regret it. This unique book will give you a lot of positive aspects than the other book include such as help improving your talent and your critical thinking technique. So , still want to hold up having that book? If I ended up you I will go to the guide store hurriedly.

Robert Olsen:

What is your hobby? Have you heard in which question when you got scholars? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person including reading or as examining become their hobby. You need to understand that reading is very important in addition to book as to be the issue. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You get good news or update concerning something by book. Amount types of books that can you choose to use be your object. One of them is Rule Extraction from Support Vector Machines (Studies in Computational Intelligence).
