Building Web and Mobile ArcGIS Server Applications with JavaScript

Eric Pimpler

Building Web and Mobile ArcGIS Server Applications with JavaScript Eric Pimpler
Master the ArcGIS API for JavaScript, and build exciting, custom web and mobile GIS applications with the ArcGIS Server

About This Book

- Develop ArcGIS Server applications with JavaScript, both for traditional web browsers as well as the mobile platform
- Acquire in-demand GIS skills sought by many employers
- Step-by-step instructions, examples, and hands-on practice designed to help you learn the key features and design considerations for building custom ArcGIS Server applications

Who This Book Is For

If you are a web or mobile application developer, who wants to create GIS applications in your respective platform, this book is ideal for you. You will need JavaScript programming experience to get the most out of this book. Although designed as an introductory to intermediate level book, it will also be useful for more advanced developers who are new to the topic of developing applications with ArcGIS Server.

What You Will Learn

- Create maps on a web page and add dynamic and tiled layers
- Add graphics to maps
- Use feature layers to render features in the browser
- Incorporate widgets and toolbars that provide specific functionality to your application
- Perform spatial and attribute queries
- Access geoprocessing tasks including models
- Geocode and reverse geocode addresses
- Develop mobile GIS applications
- Conduct network analysis

In Detail

ArcGIS Server is the leading software for developing both web and mobile GIS applications. There are a number of programming languages that you can use to develop applications with ArcGIS Server including JavaScript, Flex, and Silverlight. However, the ArcGIS API for JavaScript is the preferred way of developing your custom applications for ArcGIS Server since it can be used for both web and mobile application development. It's easy to use and doesn't require the use of a browser plugin.

This tutorial-based guide provides you with hands-on experience in developing custom web and mobile ArcGIS Server applications with step-by-step style exercises. Along with introducing you to the HTML/CSS/JavaScript technology stack, you will learn to add intuitive geographic layers of information to

your map, interactive query and display of spatial data, add user interface widgets, access geoprocessing tasks, and many more in your own web and mobile GIS applications.

With this practical, hands-on guide, you will be able to develop fully-functional online GIS applications with ArcGIS Server using the ArcGIS API for JavaScript. After creating your own map, you will explore how to add geographic layers from a variety of sources including tiled and dynamic map services, add graphics to the map, and stream geographic features to the browser using a FeatureLayer.

Most applications include the specific functionalities implemented by ArcGIS Server as tasks. You'll learn how to use the various tasks provided by ArcGIS Server including spatial and attribute queries, identification of features, finding features by attribute, and more. Geocoding and geoprocessing tasks are covered in-depth to help you accomplish your task in GIS. Finally, you'll learn just how easy it is to integrate ArcGIS.com content into your custom developed applications.

This comprehensive guide quickly advances through probing programmatic techniques for building web and mobile GIS applications which will make application development a lot easier!

From reader reviews:

Alan Levin:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Make an effort to pick one book that you just dont know the inside because don't evaluate book by its deal with may doesn't work is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside search likes. Maybe you answer can be Building Web and Mobile ArcGIS Server Applications with JavaScript why because the amazing cover that make you consider about the content will not disappoint you. The inside or content is definitely fantastic as the outside as well as cover. Your reading sixth sense will directly assist you to pick up this book.

Richard Puccio:

You may spend your free time to see this book this book. This Building Web and Mobile ArcGIS Server Applications with JavaScript is simple to develop you can read it in the area, in the beach, train as well as soon. If you did not get much space to bring the printed book, you can buy typically the e-book. It is make you simpler to read it. You can save typically the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Sandra Maes:

Many people spending their time frame by playing outside along with friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to pay your whole day by reading a book. Ugh, you think reading a book will surely hard because you have to bring the book everywhere? It alright you can have the e-book, getting everywhere you want in your Smart phone. Like Building Web and Mobile ArcGIS Server Applications with JavaScript which is having the e-book version. So , try out this book? Let's view.

John Casper:

What is your hobby? Have you heard that will question when you got students? We believe that that query was given by teacher to their students. Many kinds of hobby, All people has different hobby. And also you know that little person such as reading or as studying become their hobby. You need to understand that reading is very important and also book as to be the thing. Book is important thing to incorporate you knowledge, except your current teacher or lecturer. You see good news or update concerning something by book. Many kinds of books that can you choose to use be your object. One of them is actually Building Web and Mobile ArcGIS Server Applications with JavaScript.
