Information Foraging Theory: Adaptive Interaction with Information (Human Technology Interaction Series) Peter L. T. Pirolli

Although much of the hubris and hyperbole surrounding the 1990's Internet has softened to a reasonable level, the inexorable momentum of information growth continues unabated. This wealth of information provides resources for adapting to the problems posed by our increasingly complex world, but the simple availability of more information does not guarantee its successful transformation into valuable knowledge that shapes, guides, and improves our activity. When faced with something like the analysis of sense-making behavior on the web, traditional research models tell us a lot about learning and performance with browser operations, but very little about how people will actively navigate and search through information structures, what information they will choose to consume, and what conceptual models they will induce about the landscape of cyberspace.

Thus, it is fortunate that a new field of research, Adaptive Information Interaction (AII), is becoming possible. AII centers on the problems of understanding and improving human-information interaction. It is about how people will best shape themselves to their information environments, and how information environments can best be shaped to people. Its roots lie in human-computer interaction (HCI), information retrieval, and the behavioral and social sciences.

This book is about Information Foraging Theory (IFT), a new theory in Adaptive Information Interaction that is one example of a recent flourish of theories in adaptationist psychology that draw upon evolutionary-ecological theory in biology. IFT assumes that people (indeed, all organisms) are ecologically rational, and that human information-seeking mechanisms and strategies adapt the structure of the information environments in which they operate. Its main aim is to create technology that is better shaped to users. Information Foraging Theory will be of interest to student and professional researchers in HCI and cognitive psychology.

From reader reviews:

Megan Snyder:

Here thing why this particular Information Foraging Theory: Adaptive Interaction with Information (Human Technology Interaction Series) are different and trusted to be yours. First of all examining a book is good but it really depends in the content of the usb ports which is the content is as scrumptious as food or not. Information Foraging Theory: Adaptive Interaction with Information (Human Technology Interaction Series) giving you information deeper as different ways, you can find any reserve out there but there is no guide that similar with Information Foraging Theory: Adaptive Interaction with Information (Human Technology Interaction Series). It gives you thrill studying journey, its open up your personal eyes about the thing which happened in the world which is might be can be happened around you. You can bring everywhere like in park, café, or even in your method home by train. In case you are having difficulties in bringing the published book maybe the form of Information Foraging Theory: Adaptive Interaction with Information (Human Technology Interaction Series) in e-book can be your alternate.

Doris Stanford:

The experience that you get from Information Foraging Theory: Adaptive Interaction with Information (Human Technology Interaction Series) will be the more deep you rooting the information that hide within the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to comprehend but Information Foraging Theory: Adaptive Interaction with Information (Human Technology Interaction Series) giving you thrill feeling of reading. The writer conveys their point in particular way that can be understood simply by anyone who read this because the author of this reserve is well-known enough. This kind of book also makes your own vocabulary increase well. Making it easy to understand then can go to you, both in printed or e-book style are available. We propose you for having this particular Information Foraging Theory: Adaptive Interaction with Information (Human Technology Interaction Series) instantly.

Joseph Barnett:

Hey guys, do you would like to finds a new book you just read? May be the book with the name Information Foraging Theory: Adaptive Interaction with Information (Human Technology Interaction Series) suitable to you? Often the book was written by renowned writer in this era. The book untitled Information Foraging Theory: Adaptive Interaction with Information (Human Technology Interaction Series)is the one of several books which everyone read now. This kind of book was inspired lots of people in the world. When you read this book you will enter the new dimensions that you ever know previous to. The author explained their plan in the simple way, thus all of people can easily to be aware of the core of this publication. This book will give you a great deal of information about this world now. So you can see the represented of the world in this particular book.

James Martin:

A lot of publication has printed but it is different. You can get it by online on social media. You can choose the very best book for you, science, comedy, novel, or whatever by searching from it. It is known as of book Information Foraging Theory: Adaptive Interaction with Information (Human Technology Interaction Series). Contain your knowledge by it. Without making the printed book, it might add your knowledge and make anyone happier to read. It is most significant that, you must aware about book. It can bring you from one place to other place.
