Looks Easy Enough: A Joyful Memoir of Overcoming Disease, Divorce, and Disaster Scott Stevenson

LOOKS EASY ENOUGH is a work of narrative non-fiction recounting a four year period in the author's life where at the age of forty-six he marries for the first time, retires, and moves with his bride to a small mountain town to live the simple life. Instead, he finds himself supporting his wife through cancer, helping his sister through a grueling four year divorce from an abusive husband, painfully witnessing their retirement money circle the drain in the biggest stock market crash since the Great Depression, and watching as a thousand foot wall of dense smoke and raging flames (the Cedar Fire - San Diego, California) approaches their home - the home they spent the last three years building themselves. With the flames less than a hundred yards from their back door they realize, they could lose everything. Yet through it all - cancer, divorce, market crashes, and forest fires - the author ultimately sees the events for what they really are . . . and comes out smiling.

The refrain, "looks easy enough" is the author's general attitude towards life's many processes - from breast reconstruction (cancer) to pouring concrete foundations to filing legal documents. It is also intended as an empowering affirmation to inspire readers with the confidence that they, too, can tackle even the most disheartening of life's challenges and land on their feet.

The book is a tale of love, adventure, personal growth, a do-it-yourself story and a comedy all rolled into one compulsively readable volume.
