Washington University School of Medicine Department of Medicine

The Washington Manual® Geriatrics Subspecialty Consult (The Washington Manual® Subspecialty Consult Series) Washington University School of Medicine Department of Medicine

This handbook from the Washington University School of Medicine is a practical guide for medical students, residents, and fellows treating older adults. It was prepared by residents and fellows in internal medicine, geriatrics, cardiology, ophthalmology, rheumatology, and urology, with faculty advisors from the Division of Nutrition and Aging. The authors provide a framework for approaching the important issues that arise in geriatrics and focus on key aspects of the evaluation and treatment of common geriatric disorders and consultations.

The book covers symptoms and diseases, acute and chronic problems, and inpatient and outpatient approaches with the same front-lines practicality as the world-famous **Washington Manual® of Medical Therapeutics**. Tables and appendices provide rapid point-of-care access to information such as cognitive and functional assessment tests and important drug interactions.

This handbook is also available electronically for handheld computers. See PDA listing for details.

The Washington Manual® is a registered mark belonging to Washington University in St. Louis to which international legal protection applies. The mark is used in this publication by LWW under license from Washington University.
