A Sociological Approach to Health Determinants Dr Toni Schofield

A Sociological Approach to Health Determinants investigates how the social works in determining health and health inequity. Taking a global perspective, the book shines a light on how experiences of health, illness and health care are shaped by a variety of complex social dynamics. Informed primarily by sociology, the book engages with the WHO's social determinants of health approach and draws on contributions from history, political economy and policy analysis to examine issues such as class, gender, ethnicity and indigeneity, and the impact they have on health. A Sociological Approach to Health Determinants is a comprehensive resource that provides a new perspective on the influence of social structures on health, and how our understanding of the social can ensure improved health outcomes for people all over the globe. Toni Schofield is Associate Professor at the University of Sydney. She specialises in research and teaching in sociology, and public policy and administration.
