Creating art is always a fun and mind developing way to spend your time. It is commonly known as “artistic meditation” as it calls for absolute concentration and thus it is easy to get lost in the patterns one stroke at a time. As a result it can improve on self esteem and well being. It is not only an enjoyable and relaxing pass time activity; it can also become a source of income. Creating a zentangle brings to life small pieces of abstract and unplanned black and white art created from simply structured patterns called tangles. This art form does not call for any particular skill or talent and anyone can do it. It can be drawn with either the left hand or the right hand and the results are often positively surprising. From this book, you will learn how to create your own unique zentangles, how this particular art differs from doodling, the essentials and other materials needed for it and patterns that are commonly used. Following on, you will soon have your own unique collection of them to archive or showcase. This book is meant to encourage everyone to the beautiful reality of simple art. Creating a Zentangle is not time consuming as it will take you only 15 minutes to complete one piece and it does not require any kind of software or technology for that matter. The process of which a zentangle is created is referred to as tangling.

The topics below will be covered in detail throughout the book to enhance your understanding and spur your imagination:

- What is a Zentangle?
- Why is a Zentangle Different from Doodling?
- Key Philosophies and Essentials of a Zentangle
- Creating Your Own Zentangle
- Common Tangle Patterns for Beginners
- Inspirational Designs
